

2010 Microcheck Price List

The MICROCHECK service will help you take the guess work out of milk quality management using new PCR technology for the detection of DNA in mastitis pathogens. In addition to the detection of mastitis pathogens, our Bacto Breakdown service uses traditional culture methods to assess levels of bacteria in the milk relating to high Bactoscan results in bulk samples.

Bacto Breakdown on a bulk milk sample

	Price (£)
Ad-hoc test	45.00
Quarterly test (four times per year)	150.00

Remember for the majority of producers, bulk milk samples will be available in the NML fridges for testing providing you with a simple and hassle free service. Just call our customer services department with your milk buyer and producer ID and our team will be able to verify for you whether a fridge sample is available for testing. If fridge samples are not available an insulated kit can be sent out for sample submission direct to the laboratory at an additional cost of £3.00

Mastitis ID on individual cow milk (whole or quarter) samples

	Price (£) per sample
1-5 sample kits	17.50
> 5 sample kits	15.00

Mastitis ID kits are available to order from our customer services department and will be dispatched on day or order if requested by 2pm. If you have >20 samples for testing at any one time, please call customer services to discuss kit supply options.

All prices are exclusive of VAT and subject to change.

To order all testing please call Customer Services on 0844 7255567
