Notes: Each official Recording covers a 24-hour, noon to noon period. The first date of each pair quoted is for the afternoon (PM), evening, or first milking of the period. This is also the official Recording Date. The second date of the pair is the following morning's (AM) or final milking of the period. For 'Factored' herds, the due date of the recording visit will alternate between the PM and AM dates at each successive recording. Recording on the scheduled dates helps NMR manage the transport and testing of your samples and prompt return of your results.

To determine your scheduled recording date in any particular month: 1) check your Sequence Number from the top right corner of your Weighing Summary page, 2) find the row in the table corresponding to that sequence, 3) move across that row to the column for the month of your choice, 4) read the date(s) when your recording is due. E.G. If you are using sequence 8, your scheduled recording for November falls due on the PM 15th Nov and/or AM 16th Nov.

Recording on the scheduled dates helps NMR manage the transport and testing of your samples and prompt return of your results.

To determine your scheduled recording dates: 1) Find your last recording date in the body of the table. 2) Note the letter on the LEFT of that date. This is your recording pattern. 3) Subsequent recordings fall due on the dates corresponding to that pattern letter. E.G. If you record on 14/15th Oct, you are using pattern H. Your next recording will be 30th Nov and 1st Dec.
